

I would appreciate the FCC voting against the NAB's petition 04-160. Satellite Radio (in general) greatly adds to my driving experience. Specifically, the ability to listen without having to listen to commercials, on air personalities "bantering" about useless subjects etc. has made Satellite Radio enjoyable again.

When I consider how having access to timely weather and driving reports (without the above mentioned bantering) will add to that driving experience, I look forward to it.

PLEASE reject HR 4026.

Sincerely,
Dave Kifer
